Revision Number	1
Creation Date	05/05/2026
Last Update	07/09/2026
File Name	mobile_data_sharing
Purpose	This manual describes the procedure for enabling mobile hotspot tethering to share a cellular data connection from a mobile device to a corporate laptop or workstation
Prerequisites	• The mobile device is powered on and has an active and sufficient cellular data plan. • The corporate laptop or workstation has Wi-Fi capability enabled.

Step 1

Accessing the menu

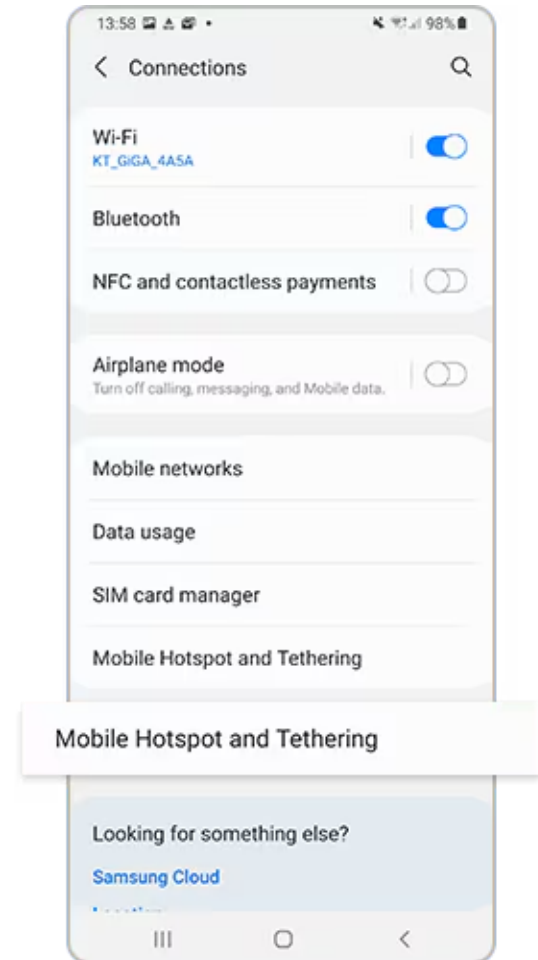

1. Open Settings
2. Tap on Connections

Step 2

Accessing Hotspot Options

Scroll down and tap on **Mobile Hotspot and Tethering**

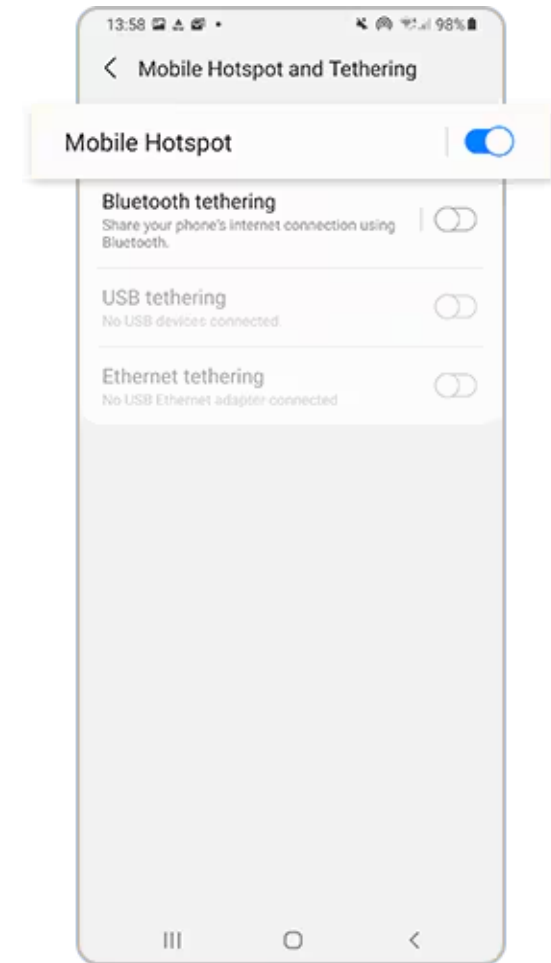

Step 3

Hotspot Details

Tap directly on the **Mobile Hotspot** text area

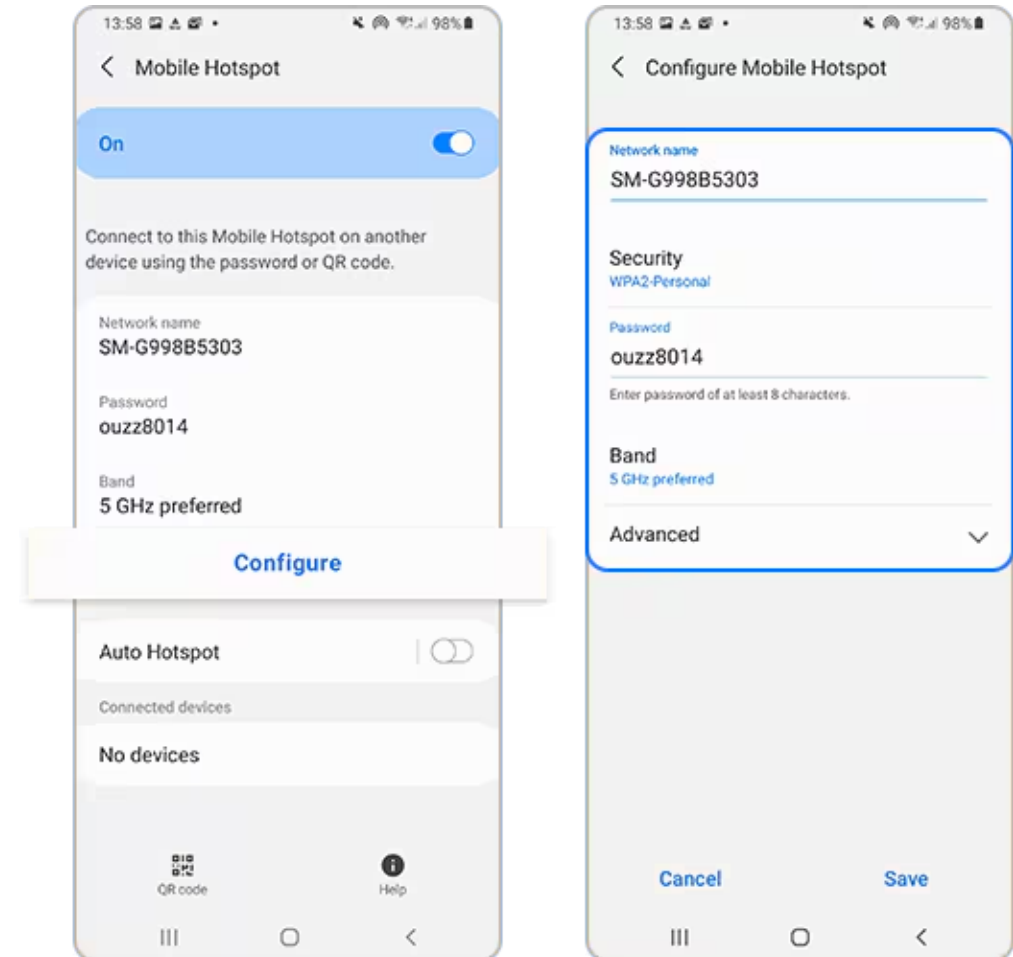

Note: Tap the text line itself to open the settings menu. Tapping only the toggle switch will turn the feature on or off without displaying network credential

Step 4

Configuring and Enabling Hotspot

1. Inside the **Mobile Hotspot** menu, view or edit the configuration parameters
2. Toggle the switch at the top to **On** to start sharing mobile data

Step 5

Connecting to the Hotspot

1. On your target laptop, scan for available **Wi-Fi** networks
2. Select the one that matches **Network Name**, enter the **Password** and establish a connection
